(54) Title: PORTABLE INTERACTIVE DISPLAY SYSTEM

(57) Abstract: The invention relates to portable in-
teractive display systems, which may be used with
for instance advertising using multimedia presen-
tations. Past portable display systems have not al-
lowed the audience to interact with the display in
an effective manner. The device of the invention is
configured to be mounted on the human body with a
general support frame (20) while displaying a video
image from a display (70). A carrying sack (40)
contains media generating means. An input device
allows the audience to interact with the display sys-
tem to play video games or use software applica-
tions, wherever the display system may be.
